**“Clinical Bioethics and Church Directives:
Dealing with Ethics in Today’s World as a Catholic”**

This course will attempt to create a deeper understanding of the Ethical and Religious Directives, and present real cases that can provide Catholic Healthcare Workers insight as to how the beliefs we hold as Catholics intersect with the real situations we encounter in the healthcare workplace. The circumstances of Clinical advancements will not create easier Ethical Questions but much harder ones in the future. Catholic health care workers must be prepared to represent our faith going forward.
